COMPANY BACKGROUND

Greeley Farms Landscaping operates out of the original farm located in Wilton, NH. Currently occupying over 100 acres that house the home office, maintenance headquarters, equipment, and all different types of aggregate, mulch and soil sales.

Greeley Farms Landscaping has been the NH, VT and Northern MA area with commercial and residential landscape services since 2005.

OUR CULTURE

OUR MISSION

To build distinctive landscapes that exceed the overall expectations of our clients. We are able to do this by providing our clients with well trained landscape professionals, communication throughout the projects, and bringing to the table our experience within the industry.

OUR PHILOSOPHY

Greeley Farms philosophy is simple, do it right the first time. This to us means, from the first call to the time we leave a project, there is open communication. At each consultation we provide transparency in our effort to aid you in your landscape vision and goals. Once started, we always use the industries best practices throughout the entire project which is then followed by the warranty program that will leave the client feeling sure they made the right choice with Greeley Farms.

OUR COMMITMENT

Greeley Farms commitment to our clients boils down to quality. We realize that pricing can often be a large factor in a clients' decision, but we start with quality first. It is important to us that our client not only receives a good "price," but a good value as well. From a 1-yard delivery to a full design/build landscape, we are committed to quality landscape products and services. You may receive a cheaper price from our competitors, but you will never get a job better done.

Masonry at Greeley Farms is not just brick and mortar. From elaborate stone walls and firepits to cultured stone and outdoor kitchens, built to impress and built to last.

Offering a full suite of site solutions including drainage, septic systems, excavation, and grading. This division compliments our landscape background, enabling our teams to be a start to finish contractor for everything dirt!

We offer a full range of hardscapes from vertical retainers to intricate flatwork. Each installation reflects top quality craftsmanship, delivered on time and on budget.

Softscaping includes plantings of all varieties and styles. Sourcing from top of the line growers, installed by knowledgeable professionals who will take the time and care to ensure the plants success.

From various conservation projects, stream and shoreline restorations, to erosion control, we pride ourselves in taking out the complication associated with wetlands, always practicing minimal impact.

We carry an array of organic soils, mulches, aggregates and compost, whether you would like to pick up at our yard or have them delivered, we would be happy to help!

Commercial snow management includes 24/7 contract plowing and sand/salt applications that you can trust. Keeping your property ready to conduct business as usual in the most inclement of weather.

SERVICES

Greeley Farms offers a wide range of services in the landscaping sector. From excavation, hardscapes and material delivery to detailed softscapes, we take pride in being your seamless outdoor contractor.

OUR COMMITMENT

From the initial consultation and design to the actual landscape construction, we pride ourselves not only in quality, but in communication as well. It is very important to us, that our customers receive the utmost care and clarity when it comes to the scope of work and *their* vision.

With constant re-investment in top of line equipment, Greeley Farms is guaranteed to be both efficient and reliable to its clients, even in the harshest of weather conditions.

GREEN PRACTICES

Greeley Farms Landscaping is dedicated to reducing its carbon footprint within the landscaping sector. Our team has been able to achieve this by recycling old products, upgraded machinery with rigid maintenance schedules and more! These practices and others coupled with efficient processes has allowed us to pass cost savings to our customers. Another growing sector that Greeley Farms capitalizes on is organic soil supplements and practices. Through state certifications and continuing education with our Cooperative Extension, we offer a wide variety of applications specific to each client's property.

CONTINUING EDUCATION

From different safety programs to landscape expos and seminars, the Greeley Farms team is on the cutting edge of safety practices and regulations, as well the new technologies and procedures within our industry not only to provide safe working practices, but to ensure the utmost efficiency for our clients. Our employees are all OSHA 10 Certified.

TOP OF THE LINE

Constantly educating ourselves on the newest installation technologies and advancements along with equipment; our services can be provided in a timely fashion, at a competitive price.

Greeley Farms was incorporated in 2005 by **Brendon Greeley**.

Growing up on the farm where the company is now based, fostered a strong work ethic and knowledge base of agriculture and land development. Between 2005 and now, Brendon has diversified the company to provide a variety of services to both residential and commercial Clients.

Ross Kukish joined the company in the spring of 2012 with background in construction management.

Long before this partnership, Ross had experience in estate gardening and greens management at a few local golf courses. Leaving the corporate setting, Ross set out to turn his landscaping passion, into a career.

LEADERSHIP

COMMERCIAL EXPERIENCE

Greeley Farms Landscaping fosters an environment of communication, professionalism and attention to detail that excels in the commercial construction setting. Along with that culture, our understanding of the necessary paperwork, insurances and safety requirements have allowed us to be a proven team player with construction managers.

With the understanding that our scope is typically the final piece to the puzzle and a transformation of a long time construction site to final product, we work hard to ensure that when we leave a project, everyone is satisfied and excited about the project. This has translated to not only great outcomes but further instilled trust by the owners and construction managers.
